

6" Color Touchscreen OIT Comparison

Maple Systems' HMI520T V.S. Automation Direct EZS6C-F

More features and a lower price make our HMI520T the EZ choice

Our customers want versatility and extreme function in an HMI without breaking their budgets. That was our guiding principal when we engineered our Silver Series. We set out to design a low-priced touchscreen interface that has robust function and quality features, and we exceeded even our own expectations.

We're so confident you'll love our HMI520 with its low price that we went head-to-head with Automation Direct's 6" color touch panel, the EZS6C-FS:

		Maple Systems' HMI520T	Automation Direct's EZS6C-F
Unbeatable Price			
Price (Non-Ethernet)		\$599	\$845
Price (Ethernet)		\$699	\$1,035 (unit plus optional Ethernet Module)
1 MB Flash		Standard	\$51 (Standard 512K plus 512K Flash expansion)
1 MB RAM		4MB Standard	\$107
Operating Software		\$75	\$140
Quantity Discounts		Up to 20%*	No
Totals	6" Non-Ethernet	\$674	\$1,143
	6" Ethernet & CF	\$774	\$1,333

More powerful hardware		
Display Type	TFT	STN
Processor Speed	200 MHz	40 MHz

<u>Screens</u>	1,999	500-999
<u>Online Simulation Mode</u>	Yes	No
<u>Popup Windows</u>	Yes	No

More for less...

Pay less - get more. It seems a novel concept in today's world, but its one of our core values. Our customers save money and still get a quality product that outperforms the competition by leaps and bounds. And that's a promise you can take to the bank.

The numbers speak for themselves...

- Bolder, brighter display
- 2x the colors
- 4x more memory
- 5x faster
- Our TFT is *hundreds* less than their STN
- More powerful, functional graphics
- More design freedom
- More ways to animate
- Deeper discounts for OEM and volume pricing
