

USB Host Adapter Card

Model USBHA

Add a second USB host to any Windows 98 or Windows 2000 machine with model **USBHA**. If the PC comes standard with two USB ports, adding this card will effectively double the USB bandwidth. A perfect example for the need of this product is when you have several data collection devices connected to your PC through the standard USB host resulting in slowed or lost data. By adding the USBHA, you can improve or eliminate these problems by connecting some of the data collection devices to the original host and the rest to the newly added USBHA host.

The USBHA requires a standard PCI slot and is compatible with USB 1.1 specifications and Open HCI 1.0a. Connect any USB compliant device to the USBHA such as hubs, scanners, printers, PC cameras, digital cameras, keyboards, telephones, etc.

Specifications

Bus type:	PCI V2.1
Connectors:	2 USB type A female
Compatibility:	USB 1.1 specifications and Open HCI 1.0a
Operating systems:	Windows 98, Windows 2000
Compliance:	FCC, CE
